1. Please note that the instant claims are almost identical to those allowed in parent application 10/160,361; the only difference is the phrase "less than" in the instant claims as a modifier of the degree of unsaturation. As such the Examiner will simply provide the same reasons for allowance as those found in the parent application (now abandoned).

2. The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest the instantly claimed polyether urethane. Specifically the prior art fails to provide adequate motivation to blend the two different components a) and b). Stuart teaches silylated polyether sealants in which a polyol has a monol content (which when silylated will form polyether urethanes having 2 silane groups and having 1 silane group) but the instant claims specifically exclude the aminosilanes taught by Stuart and patentee does not provide any motivation to select a compound meeting formula (I). In addition, Stuart is silent as to the degree of unsaturation. Note too that Stuart prefers a diol/monol content lower than that required to form the claimed components a) and b). In fact, the monol content of 31% results in inferior results (column 11, line 53). WO 02/06367 teaches a polyether urethane having from about 50 to about 95% of silylated NCO groups but this does not adequately suggest the weight percentage of a) and b) as required by the claims, nor the molecular weight or degree of unsaturation limitations of a). WO 98/18843 teaches polyether urethanes and generally states that one or more hydroxyl groups can be present, but prefers diols. See page 9. In view of the lack of a specific teaching of a polyether urethane having one hydroxyl group there is no motivation to use a combination of polyether urethanes as claimed. WO 00/26271 also fails to teach or suggest a blend of polyether urethanes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
